- - - - -

* COTONEASTER PRAECOX *

- This is one of the hardiest Cotoneasters and went through 20 degrees
 * below zero without any harm. It has large berries like cranberries
 - which color up in the middle of August and remain on until very late
 * Fall. It grows rather flat and makes an ideal plant to mix in with
 - foundation plantings and especially with ranch type houses. It also
 * makes an ideal low spreading hedge.
 -

* 2,500 2 yr. tr., 8-12" .50 .45 *

| - RHUS COTINUS ROYAL PURPLE - | | | |
| * (New dark purple-red leaf Smokebush) * | | | |
| - There are several varieties of Purple Smokebush although Royal Purple is | | | |
| * considered the very best. Several varieties of Smokebush have been tried | | | |
| - out in the nursery with Royal Purple always turning out to be the most | | | |
| * satisfactory. I am convinced of this to the extent that it is the only | | | |
| - one now being propagated in the nursery. Royal Purple keeps its rich | | | |
| * dark purple reddish colored foliage from Spring to late Fall. In late | | | |
| - summer the matured leaves show a mottled edge which is a light red edge | | | |
| * around the dark purple leaf. It is an outstanding plant in that it | | | |
| - draws the attention of all who visit the nursery and is greatly admired | | | |
| * for its brilliant foliage. The foliage is darker than any red Japanese | | | |
| - Maple. The plant is adaptable for use as a lawn specimen especially in | | | |
| * locations where the Japanese Maple is not hardy. Royal Purple is the | | | |
| - only purple Smokebush to receive a Certificate of Merit from the Royal | | | |
| * Horticultural Society. | | | |
